

10 MEMBERS PASS CPR TRAINING!

Ray Amidei from the Lincolnshire Fire Department gave a class in CPR techniques, the use of an AED (Automated External Defibrillator) in addition to choking hazards and remedies.

It was a valuable 2 hours spent talking about the risks that can occur anytime, anyplace to someone of any age. Being trained in these basic life-saving measures gives you a peace of mind and confidence that you will be able to help in an emergency.

This course, approved by the American Heart Association, is always updating and changing with new medical knowledge. Therefore, even if you had training some time ago, everyone is encouraged to update their skills with this easy 2-hour course...it could save a life!

The club members who participated are Ron & Gayle Althardt, Clark & Martha Briggs, Wilbur & Pam Buckle, Barb Harms, Jerry Mulick and Sue Radder. Each participant received a completion certification good for 2 years.

Thanks for caring!

Ed Harms, Safety Chairman
